

# C++ - Module 03

## Inheritance

*Summary:*

*This document contains the exercises of Module 03 from C++ modules.*

*Version: 7*

# Contents

<b>I</b>	<b>Introduction</b>	<b>2</b>
<b>II</b>	<b>General rules</b>	<b>3</b>
<b>III</b>	<b>Exercise 00: Aaaaand... OPEN!</b>	<b>5</b>
<b>IV</b>	<b>Exercise 01: Serena, my love!</b>	<b>7</b>
<b>V</b>	<b>Exercise 02: Repetitive work</b>	<b>8</b>
<b>VI</b>	<b>Exercise 03: Now it's weird!</b>	<b>9</b>
<b>VII</b>	<b>Submission and peer-evaluation</b>	<b>11</b>

# Chapter I

## Introduction

*C++ is a general-purpose programming language created by Bjarne Stroustrup as an extension of the C programming language, or "C with Classes" (source: [Wikipedia](#)).*

The goal of these modules is to introduce you to **Object-Oriented Programming**. This will be the starting point of your C++ journey. Many languages are recommended to learn OOP. We decided to choose C++ since it's derived from your old friend C. Because this is a complex language, and in order to keep things simple, your code will comply with the C++98 standard.

We are aware modern C++ is way different in a lot of aspects. So if you want to become a proficient C++ developer, it's up to you to go further after the 42 Common Core!
